

PEGADORA DE CAJA
 GT850 FONDO AUTOMATICO
 High speed folder and gluer machine

RE	Automatic High speed carton boxes Folder Gluer	
ITEM	DESCRIPTION	
1.	Automatic high speed boxes Folder Gluer Brand :TECNOFLEX Model : GT850 FONDO AUTOMATICO Origin : CHINA	
Specification		
Box Type	Paper Size (W x L)	
(straight line)	Max 850×800 mm Min: 200×120 mm	
(lock bottom)	Max 800×700 mm Min: 200×140 mm	
Paper weight	corrugated carton, paper cardboard, Flute E, C, F	
Max speed	350m/min	
Overall dimension	14800 (L) ×1400 (W) ×1500mm(H)	
Weight	4500Kg	
Power consumption	18.2KW	
Box Type	Side Gluing, Lock Bottom and other boxes which will be added the same moulds.	

2. FEATURES

- the machine is unit-type structure, which can work in with other function structures.
- The host is controlled by computer with wireless remote device and improved the operations flexibility.
- The machine adopts below outsourcing packed belts and you can change belts easily without tearing down shafts.
- Feeder, host and delivery systems are controlled by inverters and they can run together or one runs.
- The steel plates are 20mm, and it makes sure the machine with high speed and no shaking.
- All the adjusting plates are automatic.
- The feeding belt is Japan original Nitta belts.
- The machine has worm-driving system, which can run more than 15 years.

3. FEEDER

<ul style="list-style-type: none"> ● Japan NITTA feeding belts ● Equipped with adjustable feeding knives: ● Equipped with vibrator motor : ● Equipped with Japanese infinite speed regulator : 	<p>7pcs</p> <p>2 pcs</p> <p>1 set</p> <p>1 set</p>	
<p>Optional</p> <ul style="list-style-type: none"> ● Inner couriers are adjusted by motors 		
<p>4. pre folding System</p>		

- 1st folding line has 180°
- 3rd folding line can fold 135°
- It is for perfect folding

5. lock bottom

- EASY lock bottom fixing system
- Flexibility lock bottom parts
- Rail-guide for belts are used to avoid belts going to sides.
- NITTA folding belts

7. Glue system

2 pcs top glue tanks
2 pcs below glue tanks
Easy to clean the glue

8. Folding section

The belts are NITTA
It is use for folding and make perfect boxes

9. trombone

The belts are NITTA
It is use for perfect pressing boxes

10. delivery

Best motors for adjusting the pressing position
Perfect pnumatic pressure system

11. Main electrical components and brand

Name	Made in	Brand
Feeding belts	Japan	NITTA
Folding belts	Japan	NITTA
Synchronous belts	Germany	Contitech
Inverter	France	Schneider
Sensor in output	Taiwan	FATEK
Infinite speed regulator	Japan	SAKAI
Ball bearing with seat	Japan	HRB
PLC	Taiwan	FOTAK
touch screen	Taiwan	FOTEK
Main motor	Taiwan	TECO
Motor in conveyor	Taiwan	AIMOXIN
motor for adjusting screw bars	Xiamen	JSCC

Power supply switch	France	Schneider
Electrical components	France	Schneider

10. REMARK	
1.	CIF
2.	Training by video and documents. - SELLER
3.	Testing materials - BUYER
4.	Air compressor - BUYER
5.	Exhaust system outside of the machine. - BUYER
6.	Foundations: electric power and ducting device. - BUYER
11. ELECTRICAL SYSTEM:	
<ul style="list-style-type: none"> ● Inverter and low-voltage electrical components: Schneider ● Motor: Taiwan TECO Brand ● PLC control system ● Main motor: 7.5KW. 	
12. DELIVERY	30 DAYS READY IN CHINA FACTORY
13. WARRANTY	1 year On Mechanical on normal operation. 6 months on Electrical Parts (With Effect from the date of Installation) Excluding : (i) wear & tear parts (ii) Breakdown of machine caused by misuse or carelessness.
14. INSTALLATION	Quotation including setting up the machine and training.
15. PAYMENT	30% DOWNPAYMENT BALANCE BEFORE SHIPING

16. Plasma system (OPTIONAL)
